

R-300 rinse aid

For automatic dishwashing machines

DESCRIPTION:

R-300 rinse aid for automatic dish washing machines is a liquid surfactant which reduces the surface tension of the rinse water. This will allow for an even and rapid evaporation, eliminating spotting. The injection of minute quantities of rinse aid will make glasses spotless and sparkling. This product can be used with any liquid dispensing system and is to be injected into the rinse water supply. This product contains a chlorine stable scale inhibitor. It will keep the dishwasher deposit free without use of any water softener.

- PHOSPHATE FREE

DIRECTIONS:

FOR BEST RESULTS:

Exact adjustment is required for individual installations as a result of local conditions. However between 100 - 400 ppm is generally required to suppress foaming and eliminate any watermarks.

NOTE: All surfaces subject to direct food contact must be thoroughly rinsed with potable water. Avoid contamination of food during use. Do not store in food-processing or food-storage area.

PHYSICAL PROPERTIES:

Boiling Point	100°C
Specific Gravity	(H ₂ O = 1): 0.95 at 20° C
Vapor Pressure	(mm Hg): N/A
% Volatile	(Wt %): N/A
Vapor Density	(Air = 1): N/A
Evaporation Rate	(Water = 1): N/A
Solubility in Water	Complete
pH (sol. 1%)	Approx. 4
Physical State	Liquid
Viscosity	1 cps at 25° C
Appearance and Odor	Red Liquid with alcohol odour
Odor Threshold (ppm)	n/a

TDG CLASSIFICATION: Exempted as an aqueous alcoholic solution.

GHS CLASS : Flammable liquid — category 3; Eye irritant - Category 2

STORAGE: Keep in a tightly closed container in a fresh and well-ventilated room. Keep from freezing.
