Compliance Audit Schedule

ECOLOGO conducts facility re-audits every three years for non-ISO 9001 certified facilities, and every four years for ISO 9001 certified facilities, provided there have been no major changes that would affect the audit results within the three year period. Major changes include, but are not limited to, manufacturing process changes or relocation of manufacturing facility, etc. UL Environment reserves the right to request more frequent re-auditing at an additional cost if it is deemed necessary; however, these decisions will be made on a case-by-case basis and only after careful consideration. If there are multiple manufacturing facilities, at request, UL Environment can adjust the schedule to prevent all audits from occurring in the same year.
